Profile

I specialize in functional brain connectivity estimation from electrophysiological data (EEG/MEG). This involves using **DSP**, **statistics**, and **machine learning**. For my daily job, I use **Python**, **MATLAB**, **Latex**, and **Bash** with occasional usage of **C/C++** and **Java**.

Education

Ph.D. in computer science

Moscow, Russia

Higher School of Economics, Faculty of Computer Science — *Jan. 2016 – Nov. 2021*

- Thesis: "Optimal methods for functional connectivity estimation in magnetoencephalography."
- Published a paper in a leading neuroscientific journal (see Ossadtchi et al. [2018]) by proposing a method for signal leakage suppression when measuring brain areas interaction from EEG/MEG data. Programmed the algorithm and validation scripts in **MATLAB**

Ph.D. in Computational Fluid Dynamics *(unfinished, transferred to CS program)*

Moscow, Russia

Lomonosov Moscow State University, Department of Mechanics and Mathematics — *Sep. 2013 – Jan. 2016*

- Thesis: "Numerical simulations of reactive gas flows."

Specialist degree in Mechanics *(Masters equivalent)*

Moscow, Russia

Lomonosov Moscow State University, Department of Mechanics and Mathematics — *Sep. 2008 – Jun. 2013*

- Thesis: "Enhancement and validation of LOGOS software for simulations of the reactive fluid flows."

Experience

Artificial Intelligence Research Institute (AIRI)

Moscow, Russia

Research fellow — *Feb. 2022 – Present*

- Developing real-time EEG neurofeedback pipeline in Python
- Building machine learning model to predict speech from MEG data

Higher School of Economics, Faculty of Computer Science

Moscow, Russia

Senior lecturer — *Aug. 2019 – Dec. 2021*

- Developed and taught a course "**MATLAB** for data analysis" to undergraduate psychology students

Higher School of Economics, Centre for Cognition and Decision Making

Moscow, Russia

Junior research fellow — *Feb. 2017 – Dec. 2021*

- Curated and published MEG dataset for metacognition research using BIDS and OpenNeuro. Developed an analysis pipeline in **Python**, ("metacognition" on github), supervised 2 students on using it. Manuscript is submitted to Neuron.
- Led 4-people group developing software for real-time feature extraction and 3D visualization of brain activity from EEG in **Python**
- Sped up by a factor of 10 the beamformer inverse solver in MNE-python by modifying the algorithm for vectorized computations
- Administered a laboratory GPU cluster running **Linux**

University of Montreal, CERNEC lab.

Montreal, Canada

Visiting researcher, temporary position — *Oct. – Dec. 2015, May 2016 – Dec. 2016*

- Preprocessed MEG dataset of 90 subjects for classification using **Python** scripts
- Built a classifier for ASD patients vs. Controls with 75% accuracy using classical ML and information geometry in **Python**
- Co-developed an open-source **Python** package for heavy neuroimaging data processing, Neuropycon, Meunier et al. [2020]

Moscow State University for Pedagogics and Education, MEG Center

Moscow, Russia

Junior research fellow — *Feb 2015 – Dec 2018*

- Published two papers in international collaboration with the University of Montreal, see Alamian et al. [2017a,b]

Scientific Research Institute of System Analysis

Moscow, Russia

Research assistant, promoted to junior research fellow — *Jun. 2011 – Jan. 2015*

- Validated commercial software for simulations of flow in jet engines by comparing simulated vs. theoretical shock wave parameters

Honors & Awards

- Selected together with other 178 people across the university for *2-year Higher School of Economics Academic Scholarship* for publishing a paper in a high-impact journal — *Moscow, Russia* — *2019*
- Selected 1-st out of 5 teams together with 2 teammates in *IEEE Brain Data Bank Challenge* for building a competitive 2-players drinking game based on brain-computer interface — *St. Petersburg, Russia* — *2017*

Conference contributions

Poster presentations

Biomag 2018 — *Philadelphia, USA*

Oblique projection for phase shift invariant imaging of coherent sources — *2018*

Biomag 2018 — *Philadelphia, USA*

NeuroPycon: A python package for efficient multi-modal brain network analysis — *2018*

5th Workshop on Optically-Pumped Magnetometers — *Freiburg, Switzerland*

OPM vs. SQUID arrays in MEG Functional Connectivity Estimation — *2017*

Biomag 2016 — *Seoul, South Korea*

Power and shift invariant imaging of coherent sources by MEG data — *2016*

Brain Connectivity Workshop 2015 — *San Diego, USA*

Globally-Optimized Power and Shift Invariant Imaging of Coherent Sources — *2015*

Talks

International conference "Brain-Computer Interface: Science and Practice" — *Samara, Russia*

Cognigraph: a real-time EEG-based source imaging software — *2019*

Comprehensive training "MEG at McGill" — *Montreal, Canada*

MEG resting-state in autism. Approach to analysis. — *2015*

Int. scientific school "Problems of functional synchronization assessment based on MEG/EEG data" — *Moscow, Russia*

Globally-optimized power and shift invariant imaging of coherent sources (GO-PSIICOS) — *2015*
